## **CLAIMS 1-22 ARE PRESENTED FOR EXAMINATION**

### **DETAILED ACTION**

#### ***Election/Restrictions***

Restriction is required under 35 USC121 as follows:

Group I. Claims 1-19 drawn to a method for treating a subject having an autoimmune disorder or inflammatory condition;

Group II Claims 20-22 drawn to a method of assaying for agents that treat cells or tissue involved in a pathology of autoimmune diseases and inflammatory conditions.

Inventions of Group I and Group II are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different effect since Group I relates to a method of treating medical disorders and Group II relates to assaying compounds. These inventions have acquired a separate status in the pharmaceutical art as can be seen from their different classifications. Assay claims are searched in class 436 and treatment of medical disorders is searched in class 514. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

If applicant elects Group I then the following is applicable:

Art Unit: 1617

This application contains claims directed to the following patentably distinct species of the claimed invention:

TREATMENT OF EACH OF THE FOLLOWING DISEASES:

- a. multiple sclerosis;
- b. Type I diabetes;
- c. glomerulonephritis systemic lupus erythematosus;
- d. rheumatoid arthritis;
- e. psoriatic arthritis;
- f. reactive arthritis;
- g. Sjogren's syndrome;
- h. graft-versus-host disease ;
- i. muscular dystrophy;
- j. myasthenia gravis;
- k. atherosclerosis; and
- l. osteoarthritis.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1617

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Theodore J. Criares whose telephone number is 308-4607. The examiner can normally be reached on 6:30 A.M. to 5:00P.M. Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sreeni Padmanabhan can be reached on 305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-6897 for regular communications and N/A for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 308-1235.
